- ✓ and more!

Red-Cut is easy to use and requires minimal effort to deploy. Simply find the power-cord feeding your computer, place the patent-pending, **Red-Cut** preventer blades on either side of the cable, and close the **Red-Cut**. Viola! Your computer is now 100% protected against any of the above-mentioned problems.

Note: Also compatible with Apple products.

But wait, there's more!

Red-Cut Datacenter Edition

This is incredibly useful for our enterprise customers and includes complimentary **Red-Cut Hand Shields**! Perfect for those server racks and selves full of hardware. Large cables and bundles of multiple cables are easily handled by our enterprise-grade product offering. We cover all aspects of computing!

Shipping now! Get yours before our initial inventory sells out. We anticipate *huge* demand for this amazing, innovative product.

** Devices with internal batteries may take 6-72 hours before **Red-Cut** becomes 100% effective. If you need immediate protection, we also offer **Red-Stop**. Apply liberally until the device stops.*
